

STISIM Drive® M3000 Desktop

Product Overview

The M3000 Desktop is a commercial-grade driving simulator designed for assessment and rehabilitation. Its compact footprint features realistic steering force feedback, 110-degree field-of-view displays, and an immersive audio system that fully engages patients in the driving experience. The electric, height-adjustable desktop accommodates both ambulatory and wheelchair users, as long as they can use their legs, providing flexibility in clinical settings. With minimal space requirements, the M3000 is ideal for smaller environments, allowing users to supply their own seating, maximizing accessibility and placement options.

Environment

Commercial facilities

Use Cases

Clinical therapy
Cognitive assessments

Form Factor

Desktop-sized
